

# Fences

---

Two types of fences, as represented below, are recommended for the sides and rears of the homes at NewHaven. Because openness to the backyards is encouraged, fences can either contain open pickets and posts made of vinyl or aluminum spaced every 2 or 3 ½ inches or a second alternative which is a five foot high vinyl privacy panel with lattice treatment extending one foot above the fence. In both cases, it is recommended that the Mixed Use Development Code (MXD) be amended to reflect a six foot height restriction to increase safety and security providing protection for children and pets.
